 DUCT AND INNER DUCT

Endoclip Connector OFFERS EASY INSTALLATION

ROCKAWAY, NJ – ENDOT's ENDOCLIP corrugated connectors – available for Endocor 1050 and 1250 – offer much easier installation than the aluminum external clips presently on the market.

They're a real cinch to use because they don't require a pipe wrench; they just snap together. When properly installed, the **ENDOCLIP** connection is stronger than the duct itself.

The **ENDOCLIP** is the only connector on the market that can be used after cable is installed

because it comes in two pieces that snap together. Its unique design offers a smaller outer diameter than its metal counterpart, enabling it to be pulled into a duct system. In addition, it is made of corrosion-resistant, lightweight plastic. And because it's nonmetallic, it's nonconductive.

For further information about the **ENDOCLIP** and other **ENDOT** products, please contact: **ENDOT INDUSTRIES**, 60 Green Pond Road, Rockaway, New Jersey 07866, 800-443-6368.
