PIPE AND TUBING

EndoPoly The “Premium” Geothermal Pipe

5 REASONS TO USE ENDOPOLY GEOTHERMAL PIPE

1. **ENDOPOLY** is produced using Premium PE 4710 Polyethylene resin that exceeds the requirements of IGSHPA (International Ground Source Heat Pump Association).
2. **ENDOPOLY** is produced from Virgin High Density Polyethylene Resin with a cell classification of 445574.
3. **ENDOPOLY** is backed by a Lifetime Warranty, which is backed by one of the largest and oldest PE extruders in the nation, 35 years of continuous operation and production.
4. **ENDOPOLY** pipe quality is continuously monitored and third party Certified by NSF, the National Sanitation Foundation.
5. **ENDOPOLY** is available in standard coils and custom lengths with or without U-bends to meet your needs.

WHY THE RESIN IS IMPORTANT

Endot uses Bi-Modal PE 4710 resin that is 25% stronger than the older PE 3408/PE 3608 resins.

ASTM D3035-06 PE 4710 resin is rated as SDR 13.5 = 160 PSI & SDR 11 = 200 PSI.

WHY ENDOT IS THE BEST CHOICE FOR GEOTHERMAL PIPE

- Endot is one of the largest producers of small diameter pipe.
- Endot has made quality polyethylene pipe continuously for over 35 years.
- Endot is owned and operated by its founders and they have a proven commitment to making the finest polyethylene products in each industry Endot serves.
- Endot products are backed by a Lifetime Warranty with a 25 year cost of replacement warranty.
- Endot has four manufacturing facilities and many distributor locations around the USA assuring a continuous supply of product when and where you need it.
